

Small, but mighty.

The collecting system „Cleanbag“ is a collection tray for small quantities of debris.

Gets into every corner, sweeps perfectly flush to the wall because of the brush angle.

With the windrow maker, large-volume and long-fiber dirt can be dropped into a windrow.

Excellent performance in leaf removal and especially for removing snow.

Technical data

	WR 650 Battery
Brush drive	12V DC motor
Battery	12V 18Ah gel battery
Charger	special charger with automatic switch-off (overcharge protection)
Duration of use	up to 45 minutes per battery charge
Brush	Polypropylen brush
Working width	650 mm
Rotation direction of brush	left/right
max. area coverage	1.500 m ² /h
Height of brush container	18 cm (incl. brush)
Tires	pneumatic tires 260/85 with ball bearings (groove ball bearings)
Guiding wheel	125er solid tire
Weight	approx. 26 kg
Accessory	windrow maker, Cleanbag

(Technical data is approximate and non-binding.)

HIGHLIGHT

Small and agile, the WR 650 battery is ideal for narrow passages. Flush-mounted sweeping and cleaning of uneven surfaces is also possible thanks to the specially developed bristle angle.
